FOR IMMEDIATE RELEASE

Control Concepts Inc. To Offer Cost-Savings Solutions at Advanced Design & Manufacturing Expo, Toronto

PUTNAM, CT – April 28th, 2017

Control Concepts, Inc., a leading manufacturer of material flow and process equipment, will be showcasing its latest, innovative products at the Advance Design & Manufacturing Expo, taking place at the Toronto Congress Centre from May 16th – May 18th, 2017. Located in booth #2337 in the Powder and Bulk Solids pavilion, Control Concepts' sales engineers will be on hand to provide attendees with practical, cost-savings solutions for a variety of common bulk material handling and process problems.

Featuring three product lines, the Airsweep Material Flow System, Dazic Zero Speed Switch, and AcoustiClean Sonic Horn, Control Concepts offers world-class, proven solutions to a wide array of bulk processing problems. Attendees are invited to stop by the booth to discuss their specific issues with our application experts.

For more than 67 years, Control Concepts, Inc. has been manufacturing products to serve global markets including the automotive, construction, chemical, pulp/paper, petroleum, waste, asphalt, cement, mining, material handling, electrical, wire/cable, power generation, environmental, medical, transit, food/beverage and agriculture industries. Manufacturing facilities are located in Putnam, Connecticut and Weare, New Hampshire, USA. Visit www.ControlConceptsUSA.com, or call 860-928-6551 to get a free system quote for your application and learn more about the unique features and benefits of all of the Control Concepts product lines.
